

## Precision Shear Web Disk

### FEATURES

- Capacities: 0.2, 0.5, 1, 1.5, 2.5, 5, 10, and 25 t
- Compact size with low profile
- Low deflection for high output
- Electroless nickel-plated alloy tool steel construction
- Off center load compensated
- OIML C3 available for whole series
- **Optional**
  - PSD-SJTT and PSD-SJTH with different loading holes

### APPLICATIONS

- Testing machines
- Platform scales
- Hopper and vessel weighing
- Truck scales

### DESCRIPTION

A low profile design that makes PSD the most suitable application concerning critical height for safety reasons. The shear web design provides excellent performance

even when side forces are inevitable in normal operations. The typical example for side force resistance is the application in motor truck scales. PSD is constructed of alloy steel and is fully potted with special chemical compounds to IP67 to protect the cell from water and moisture attack.
